HARDSCAPES
A DIVISION OF YORK BUILDING PRODUCTS

2021 Product Catalog

LIVE OUTSIDE.®

NewLine Hardscapes is a division of York Building Products, a family-owned business with roots reaching back to 1939.

We are more than craftsmen of pavers and walls. We make an enjoyable outdoor living experience for you and your family, possible.

We've earned the trust of thousands of homeowners and contractors over the years, and spare no effort to deliver the highest quality experience possible.

Our mantra at NewLine is "Live Outside." Our goal is to help you create an outdoor experience so perfect you won't want to go back inside.

We invite you to journey through these pages and preview the possibilities of what living outside with NewLine Hardscapes can be.

Our friendly dealer showrooms are ready to meet with you to explore your dreams. You can find the dealer closest to you by visiting us at www.newlinehardscapes.com.

Welcome home to living outside.

Permeable, Traditional

Westminster is a traditional-looking permeable paver that is both visually attractive and pedestrian friendly. This system is designed to meet or exceed current stormwater management requirements. Its rectangular shape and structurally-sound herringbone pattern make it suitable for vehicular applications.

6x9

Permeable, Functional

A thick, rectangle slab with open grids that allow water to permeate through the system. Turfstone can be used for overflow parking, erosion control and parking lots where permeable paving is required. The open voids can be filled with drainage aggregate for maximum infiltration or soil to allow greenery to grow.

Elegant, Finishing Touch

Our Coping unit provides a smooth, soft roll to the edge of your patio or step application. Coping can be used for applications such as swimming pools, step treads, deck overhangs, seating areas and wall caps.

6x12

DISCOVER THE BENEFITS OF *Porcelain*.

ANTI-SLIP

The structure and texture of the porcelain paver surface reduces the risk of slipperiness.

NO SEALING NEEDED

No sealers are needed because Landmark Frontier20 is so dense, virtually nothing can stick to it!

RESISTANT TO ACID & CHEMICALS

Made with inert ingredients that do not react or accept acids and or chemicals, allowing you to make environmentally friendly cleaning decisions!

RESISTANT TO THERMAL SHOCK

Landmark's porcelain pavers are baked at temperatures up to 2300 degrees F which in turn generates a strong molecular bond, producing a very dense paver. Due to its density level, it becomes inert, allowing for extreme and sudden temperature changes within the temperature range of - 60 F +140 F.

ECO-FRIENDLY

Landmark Frontier20 porcelain pavers are produced in an environmentally-friendly facility, following the strictest state and federal regulations. Because of Landmark's environmental commitment, we can incorporate up to 20% recycled content in our USA-made porcelain pavers.

RESISTANT TO SALTS

Landmark Frontier20 porcelain pavers are completely unaffected by use of salts.

EASY TO REPLACE AND REMOVE

When not mortared or installed with adhesive, Landmark's Frontier20 can be easily removed and repositioned to suit your specific needs.

RESISTANT TO MOLD

Landmark Frontier20 is so dense that mold and mildew are not able to develop in a permanent fashion, making removal very easy and simple.

EASY TO INSTALL

STAIN RESISTANT

Landmark's Frontier20 porcelain pavers are virtually non-porous. Due to our specific baked-on glazing process, nothing can be absorbed-- including stains.

SCRATCH & FADE RESISTANT

Landmark Frontier20 porcelain pavers are an extremely hard surface, making them virtually scratch proof. And the baked on graphics are created using ingredients that are completely unaffected by the sun and elements.

SAVING OVER TIME

Low maintenance costs save big dollars year after year.

EASY TO KEEP CLEAN

Mild, environmentally-friendly detergents can be used when cleaning your porcelain pavers. Pressure washers up to 1500 PSI may also be used without concern for etching or striping.

DRIVEWAYS ARE OK

When properly installed over concrete*, Landmark Frontier20 porcelain pavers are suitable for light residential vehicular traffic.

* When installed over reinforced concrete (4" minimum) using a thinset mortar suitable for porcelain paver.

FROST RESISTANT

Landmark Frontier20 porcelain pavers are so dense that frost and freezing temperatures do not affect them.

Dimensional Wall™

dimensional wall, coping and caps in saddle

DESIGN TIP:
Build a Dimensional Wall column using the "straight" wall unit. 36 units provides a 20x20x36" column.

Natural, Simple, Beautiful

Perfect for the do-it-yourselfer, Dimensional Wall is a simple system that is lightweight and installs quickly. Great for smaller walls, tree rings and seating areas, the natural stone texture gives this system the look of real stone in a smaller scale.

Versatile, Linear, Casual

Yorkshire is a tumbled, single-piece wall system that is perfect for garden and seating wall applications. Because of the unit's symmetry, it can be turned in different directions to create a unique look. It's also great for building fire pits, outdoor kitchens, fireplaces, steps and more.

DIMENSIONS

Product	Height (in)	Width (in)	Depth (in)	Face Ft./ Pallet	Pieces/ Pallet	Weight/ Pallet (lbs.)
Yorkshire	4	12	8	30	90	2,588

Note: All dimensions shown are nominal.

4x12x8

Consider a matching fire pit for your Yorkshire wall project. For more info, see page 79.

Weathered, Soft, Casual

Featuring the look of weathered cut-stone you might find in a quaint European town, Stonegate has a more refined look than split face wall units. Utilizing a pinned connection method, two different heights and six different shapes, Stonegate is suitable for retaining and freestanding wall projects.

DIMENSIONS

3" High Units	Height (in)	Depth (in)	Length (in)	SF/Pallet	Pcs/Pallet	Wgt/ Pallet (lbs.)

Formal, Linear, Modern

The smooth, uniform face and finished edges of Stonegate Contemporary create a modern, sleek attractiveness. Stonegate Contemporary is also great for parapet walls, pilasters, columns, stairs and outdoor living elements such as kitchens, fireplaces, fire pits, benches and more. Like traditional Stonegate, Stonegate Contemporary features six different units, which simplifies the creation of random patterns and assure stunning results.

Great for Tight Spaces

MagnumStone is a large block (24x48) retaining wall system that is especially effective when used where space is limited behind the wall (cannot excavate for geogrid due to site constraints).

Stocked in our natural color, the units can be field-tinted to provide a more realistic stone coloring. Please visit the York Building Products website for more details on unit shapes, sizing and technical specifications. www.yorkbuilding.com

GATOR NITRO SAND

Gator Nitro Joint Sand is a ready-to-use mixture of calibrated sand and resins which cure when exposed to air, hardening from top to bottom of the joint. The product can be installed in wet or dry weather, in joints ranging from a minimum 3/16" (5 mm) to a maximum 2" (50 mm) joint width. The minimum joint depth is 1" (25 mm).

- 25% More strength
- 25% Faster setting time

GATOR XTREME EDGE

Gator XTreme Edge is the ultimate fiber-reinforced and polymer-modified structural edge, which creates a strong and economical edging solution for any hardscape project. Gator XTreme Edge can be used on any traditional, permeable, Gator Base, or overlay application using concrete pavers and slabs or natural and wet cast stones. Gator XTreme Edge offers permanent continuous lateral support.

ONLINE DESIGN TOOL FOR LANDSCAPE INSTALLERS:

You can now create fully-interactive tours of your client projects. These tours can help your clients visualize their potential new project, helping you close sales more effectively and efficiently. It also elevates you above your competition, by showing your clients a more realistic design.

ITEMS NEEDED FOR SUBMISSION:

Your Contact Information
Primary Dealer You Purchase From
Project Area Photography
House Dimensions
Overview of Homeowner's Needs
Spaces & Details (see below)

REQUIRED PROJECT SPACES:

Patio
Pool Deck
Walkway
Driveway
Entrances

REQUIRED DETAILS:

Wall/Columns (per section)
Steps/Stairs
Water Feature
Fire Feature(s)
Pool
Outdoor Kitchen
Seating Wall with Back
Retaining Wall
Raised Flower Beds

Try it out on your next project. We provide the NewLine Design Studio completely free-of-charge to installers. Just visit our application page at www.newlinehardscapes.com/DesignStudio

YOUR DESIGN PACKAGE WILL INCLUDE

1. 8-10 design renderings.
2. 60-90 second fly-thru video (day & night perspective)
3. 2-D construction plan (not to scale)
4. Up to 2 revisions per project (\$50 per additional revision)

Hardscape Lifetime Transferable Warranty

NewLine Hardscapes backs our manufactured paver and wall products with a lifetime transferable warranty, guaranteeing our products against manufacturing defects. This warranty is for residential construction only and is applicable where products have been correctly installed to meet industry specifications. Color variances and the appearance of efflorescence do not constitute a warranty claim. Any defective products will be replaced; however, replacement labor and transportation costs are not included in this warranty. All warranty claims must be made prior to the removal or disposal of the defective product. We will honor this transferable warranty with a proof of purchase (invoice or delivery ticket).

The foregoing warranty is exclusive and in lieu of all other express or implied warranties of any kind. Furthermore, NewLine disclaims all implied warranties of merchantability as well as all implied warranties of fitness for a particular purpose. NewLine shall not be liable for any consequential damages or incidental damages arising from any warranty claim made against it.

NOTE: This warranty does not apply to any breakage, chipping or other deterioration that was caused by improper design or installation which does not comply with applicable codes, the ICPI, NCMA and recognized work procedures. Please visit www.icpi.org or www.ncma.org for more information on installation specifications. This warranty does not apply to any damage resulting from a natural disaster or from a deliberate and/or negligent act on the part of the purchaser, owner of the building, installer or any third party.

Color

The natural materials that we use in our paving stones and retaining wall products deliver a range of colors that closely match color samples in catalogs, spec books, color swatch books, and online photos. However, NewLine cannot guarantee exact color matching. Our pavers and walls can vary slightly in color depending on environmental conditions. Therefore, colors shown are approximate representations of standard colors and shouldn't be expected to be an exact match. Final color selections should be made at your local dealer from stock product or displays. NewLine always recommends immediately verifying the product and color upon receipt. If there are any discrepancies, contact your local dealer before continuing your project. Installation of the product constitutes its acceptance. Proper installation enhances the overall color of pavement. Units should be randomly picked from at least two pallets when installing. This creates an attractive and subtle blending of color.

Efflorescence

Our warranty does not apply to efflorescence. Efflorescence is a whitish, powderlike deposit that can appear on the surface of concrete pavers. When cement hydrates, calcium hydroxide is formed. A reaction occurs between the calcium hydroxide and carbon dioxide (from the air) to form water-insoluble calcium carbonate, which is then called efflorescence. Efflorescence does not have an effect on the structural performance or durability of the concrete pavers. NewLine includes admixtures in their concrete pavers to help minimize efflorescence, but efflorescence is a natural occurrence in all concrete products. NewLine does not warrant concrete pavers and/or walls that it manufactures against the appearance of efflorescence. Efflorescence may appear immediately or within months following installation. It may remain for months or some of it may wear away. Deposits may be removed from the concrete paver surface by using proprietary efflorescence-removers. Before applying any chemicals to remove deposits, please consult your local dealer for efflorescence removal chemicals.

Polymeric Haze

Polymeric haze from the use of polymeric joint sand may appear on your concrete products if the sand was not removed from the surface of the paver properly. This does not affect the integrity of the product or your installation. The hazing will weather away naturally with time and rain. It can be removed with a specialized cleaner; you are advised to contact your contractor or the polymeric sand company used for advice on recommendations. NewLine accepts no responsibility or liability for this occurrence.

Construction Residue

A by-product of cutting with a saw is residue-filled water or concrete dust. Residue-filled water or re-hydrated dust can cling to the surface and leave a concrete stain. It is recommended to wash and remove the water or concrete dust from the surface of the pavers before it dries. Construction residue can also happen through soil disturbance or environmental elements. These contaminants should be removed immediately but do not affect the integrity of the product or your installation. NewLine accepts no responsibility or liability for these occurrences.

Compactor and Snow Removal

NewLine pavers with textured surfaces have high and low points on the surface that give them more of an aesthetic appeal. However, pavers with textured surfaces are susceptible to surface scuffing when they are compacted into place. Therefore, these types of pavers should always be compacted with plate compactors that incorporate a protective mat or other medium between the plate compactor and the surface of the NewLine pavers. This system will help ensure that paver surface scuffing is kept to a minimum. These protective mediums include: rubber matting, thin carpet or cardboard. Manufacturers of plate compactors are able to recommend other products that also can be used for this purpose. For further information on paver details, technical information and recommended construction practices, visit ICPI at www.icpi.org.

A plate compactor should not be used on our Porcelain Tile, Veranda/Chateau XL, and Rosetta Flagstone pavers. Also, snow removal equipment should have the proper spacing, bumpers, and rubber blade guards to protect the surface of the pavers. NewLine will not be held responsible for damage caused by the misuse of compaction or snow removal equipment which leaves scuff marks or burns on pavers.
