Our new Arterra Porcelain Pavers provide low maintenance without giving up on the natural stone look. High definition glazed ink jet pavers offer all of the features of natural stone pavers, with the added benefits of porcelain. With all of the same characteristics and installation techniques of natural stone, these Arterra Porcelain Pavers can also withstand freeze-thaw cycles. They can be set on grass, sand set or installed with mortar over a concrete bed.

WARRANTY

Lifetime Limited Residential Warranty

LOW MAINTENANCE

Easy to clean with a water hose or pressure washer

STAIN RESISTANT

Because of its extremely low moisture absorption, MSI Porcelain Pavers have high resistance to stains.

STRONG

Superior strength and impact resistance.

SLIP RESISTANT

The surface texture is designed to have high slip resistance, even when wet.

HIGH WEAR RATING

The glazed surface is fired at 200° F, ensuring a hard surface that is resistant to wear

UV RESISTANT

The glazed surface is baked on, ensuring the color will remain intact even after years of being in the sun.

FREEZE THAW RESISTANT

MSI Porcelain Pavers are virtually impervious to water and the properties don't change with temperature, thereby making the pavers freeze thaw resistant.

FAQ

Q. Most natural stone pavers are at least 3cm (1.25") thick. But porcelain pavers are only 2cm (0.75" thick). So are they strong enough?

A. Porcelain pavers are extremely strong even at only ¾" thick. All MSI porcelain pavers have very good impact resistance and with proper surface preparation, can be used in pedestrian walkways (sand set) or vehicular traffic (mortar set)

Q. Do porcelain pavers get hotter than natural stone or concrete pavers?

A. Our testing indicates that porcelain pavers do not get significantly hotter than a comparable color natural stone paver. And generally are cooler to the touch than concrete pavers. Surface temperature of pavers is largely a function of color, not material. In our testing in the middle of a hot day, porcelain paver surface temperatures were comparable to natural stone pavers. Dark colored natural stone pavers had higher surface temperatures than light colored porcelain pavers.

Q. How are porcelain pavers installed?

A. Arterra premium porcelain pavers are installed in much the same way as natural stone pavers. They can be sand set or mortar set. See the Arterra Premium Porcelain Paver Installation Guide for specific requirements.

Q. How do you cut porcelain pavers?

A. Use a porcelain diamond blade in a wet saw that is large enough to cut the 24" paver. Ensure the blade is sharpened and push the paver slowly to minimize the risk of chipping.

Q. Can Arterra porcelain pavers be installed on a driveway?

A. Yes. Porcelain Pavers must be mortar set if installed on a driveway. See the Arterra Premium Porcelain Installation Guide for specific requirements.

Q. Can Arterra Premium Porcelain Pavers be installed on pedestals?

A. Yes. See the pedestal manufacturer's installation instructions for specific requirements.

Q. Are Arterra pavers slippery around pools?

A. All Arterra porcelain pavers exceed industry standards Dynamic Coefficient & Friction. The surface texture has been designed to have a high slip resistance, even when wet.

INSTALLATION INSTRUCTIONS

There are many types of installation in regards to porcelain pavers. Sandset works for most residential purposes. Mortar set when you're looking to use the pavers on commercial jobs or driveways. And additionally you can set the pavers on grass or pedestals. The following pages will explain how to set for most situations.

SANDSET

- To avoid chipping the porcelain paver, only use a tile saw that has a wet cut porcelain blade.
- Spacers are necessary when installing porcelain pavers.
- CAUTION: Do not compact the porcelain pavers with a plate compactor.

STEP X STEP

INSTALLATION

1

2

3

4

1 Excavate the site, removing enough dirt to allow for the road base, sand, and paver. Compact the soil ensuring a slope away from buildings and foundations. Lay a geotextile over the subgrade to ensure separation between the base from the soil and limit weed growth. (picture of excavating)

2 Install the base and ensure it is well compacted. Install the bedding sand, compact and screed to ensure the layer is flat.

3 Set pavers. Use spacer to ensure 4mm joint space. Tamp them lightly to make sure they are level. Install an edge restraint or mortar set pavers along the edge.

4 Clean out the joints and then sweep polymeric sand into the open joints until they are completely full. Remove all excess sand and dust from the surface. Mist the pavement with water to activate the polymer and cure the mixture.

MORTAR SET

- To avoid chipping the porcelain paver, only use a tile saw that has a wet cut porcelain blade.
- Spacers are necessary when installing porcelain pavers.
- CAUTION: Do not compact the porcelain pavers with a plate compactor.

*Additional setting methods

Stepping Stone on grass

Pedestals

STEP X STEP

INSTALLATION

1 Ensure the concrete base is angled away from the building. Install a crack suppression membrane (optional) to limit reflective cracking.

3 Align the control joint in the concrete base with a porcelain paver joint.

2 Set the pavers using a Large and Heavy Tile Mortar such as ProLite Premium Large Format Tile Mortar or MegaLite Ultimate Crack Preventionmortar.

4 Use an exterior grade grout to fill the joints.

A photograph of a modern courtyard. In the center, a large, gnarled tree with sparse yellow leaves sits in a large, dark, rounded ceramic pot. The pot is surrounded by a ring of white flowers. To the right, a dark wooden planter box is filled with more white flowers. In the foreground, two large, smooth, brown spherical stools are placed on a floor of large, light-colored stone tiles with a natural veining pattern. In the background, a glass door leads into a brightly lit interior space. To the left of the door, a small, round, woven basket sits on the floor. The overall aesthetic is clean, modern, and natural.

S

Soft grays, taupes, creams, and whites swirl together in a harmonious pattern in Argento Travertino Arterra Porcelain Pavers from MSI. These durable, easy to clean, and low maintenance pavers are the perfect choice to create beautiful floors in homes and commercial properties. These large format 24x24 matte finished pavers complement a variety of design styles, from traditional to contemporary, and are particularly suited for use in busy kitchens and baths.
